Netsco Adds to Tampa Office *Kuenning to Serve Gulf Coast Region*

(CLEVELAND, *Ohio*) – NETSCO announced that it has added Jeffrey Kuenning to its Tampa office serving the Gulf and East coast regions as a naval architect and marine engineer.

Kuenning graduated from the University of Michigan in 2003 with a B.S.E. in Naval Architecture/ Marine Engineering. During his career he has developed a broad range of marine expertise including structural and mechanical design, stability analysis and engineering project management.

“We’re excited to bring Jeff on board with us in Tampa,” said Richard Mueller, NETSCO president. “Jeff has quickly amassed a strong marine background which will enable us to better serve our Gulf Coast customers and to grow our business in that region.”

For more information about NETSCO and its full range of naval architecture and marine engineering services, call 1.866.938.4043, or visit: www.netsco.us

Formed in 1984, Netsco is a marine engineering, naval architecture and design firm in Cleveland, Ohio that furnishes engineering, design, consulting services and specialty products to the maritime industry. Netsco can design vessels of all types including large and small ships, tugs and barges. As part of its services, Netsco provides complete packages of contract plans and specifications. The firm specializes in bulk material self-unloading vessels, including vessels that handle cement, taconite, limestone, coal, salt, phosphate and many other bulk commodities.
