

FOR IMMEDIATE RELEASE

Netsco Adds to Cleveland Office

(CLEVELAND, Ohio) April 8, 2011

Netsco is pleased to announce the recent addition of Shawn Collins to its Cleveland office staff. Shawn will serve Netsco clients as Sr. Project Manager.

Shawn has over twenty five years of progressive experience in the Great Lakes marine industry having worked for G&W Industries, the Manitowoc Marine Group and Oglebay Norton Marine Services. "Shawn brings a great depth of knowledge and experience to Netsco and will be a valuable team member as we continue to grow our organization" said Richard Mueller, Netsco President. "His extensive background in project management, structural and machinery repairs, modifications and upgrades; as well as Great Lakes vessel operations will be a tremendous addition to our team, and will serve our clients well."

Formed in 1984, Netsco is a Naval Architecture and Marine Engineering design firm with offices in Cleveland, Ohio and Tampa, Florida. Netsco provides a wide range of Engineering, Design and Consulting Services along with specialty products to the Maritime Industry. The firm specializes in bulk material self-unloading vessels with additional expertise in complementary shore-side equipment. With experience in cement, taconite, limestone, coal, salt, phosphate, oil, asphalt and other commodities, available services range from full vessel design to a wide range of structural, machinery, electrical, and environmental system upgrades.

For more information about Netsco and it's full range of Naval Architecture and Marine Engineering services, call 440.236.9191, or visit www.netsco.us.
